**MEMORANDUM FOR THE PEOPLE OF THESE UNITED STATES**

---

Subject: **OPERATION DEFUSE** – A Joint TAG/LRP endeavor seeking to educate the public and provide them with the tools necessary to reverse the trend towards a police/surveillance state.

1. TAG and LRP have responded to the lack of awareness concerning fusion centers and the role they play in the militarization and federalization of our local police forces by launching a nationwide campaign to educate the American public and arm them with the tools necessary to defuse the growing tension between law enforcement and the people.

2. In order to accomplish this mission, starting in January, representatives from TAG and LRP will embark on the first leg of a nationwide tour, visiting every fusion center in these united States. At each stop, Operation Defuse will host public forums, tour fusion centers and meet with the staff, harmonize with local law enforcement, educate representatives and candidates, and most importantly, provide local activists with the tools necessary for protecting and defending privacy and civil liberties in their own backyard.

3. TAG and LRP recommend that those Americans interested in embracing and defending their inherent right to be free from arbitrary government intrusion should immediately visit <http://operationdefuse.com/> , forward this memorandum to mailing lists and forums, and begin educating themselves about the threat to liberty that is the fusion center apparatus.

4. Further, it is strongly recommended that concerned citizens and/or organizations consider donating to the Operation Defuse Chipin at @ <http://operationdefuse.com/> or consider becoming a sponsor @ <http://operationdefuse.com/sponsorship> .
